

## Winter Skin Saver

### An Effective Exfoliator

Microdermabrasion, an in-office exfoliating treatment, will restore your glow, but given the price — around \$900 for the recommended six sessions — we wondered: Can at-home microdermabrasion creams and kits do the job? For two weeks, our testers used a product on just half of their face. Then Robyn Gmyrek, M.D., an assistant clinical professor of dermatology at Columbia University, in New York City, compared the before-and-after results for the six products tested. At \$50, BeautiControl Microderm Abrasion Facial Buffering Crème (a cream and buffer tool) boosted radiance and decreased the appearance of large pores.

BC Spa Resurface Microderm® Abrasion for Face is a deep exfoliation treatment that delivers optimum results with less chance of skin irritation. The tiny aluminum oxide crystals within the Microderm® Abrasion Facial Crème gently lift dead skin cells from the surface of the face, revealing clearer, more radiant and visibly youthful skin while aloe and several other essential oils help to soothe. Applying the Microderm® Abrasion Facial Crème and then buffing with the hand-held, battery-operated Facial Buffer allows for precise application and enables you to gently exfoliate while controlling the amount of pressure applied to your skin. Achievable results with BC Spa Microderm® Abrasion for Face:

- Smoother-looking skin
- Minimized appearance of pores and skin discolorations
- Reduced appearance of lines and wrinkles
- Helps makeup go on easier, wear longer and appear flawless.

**Item # 10737** only \$70 Includes BC Spa Microderm® Abrasion for Face & Facial Buffer.
